

**RESPOND**

***Little Steps***

To halt the climate emergency, we need action 'from the top' but there are also steps we can all take to take care of our world.

***And lots of little steps can make a great movement...***

# *little steps #1*

**When boiling the kettle,  
only fill enough water for  
what you'll need.**

**»»» SAVE ENERGY**

# *little steps #2*

**Eat seasonal and local by buying fruit and vegetables that are sourced locally.**

**»» REDUCE YOUR CARBON FOOTPRINT**

# *little steps #3*

**Always take your own bottle  
for water or cup for coffee -  
ask for it to be (re)filled.**

**»» REDUCE WASTE**

# *little steps #4*

**Leave the leaves - and go wild!  
Don't rake away all the leaves  
and don't mow all your lawn so  
you can grow a 'wild garden'.**

**»» INCREASE BIODIVERSITY**

# *little steps #5*

**If you can, don't use the car!  
Walk or cycle instead.**

**»» REDUCE POLLUTION**

# *little steps #6*

**Write to your MP about the environment. Support and sign petitions by pressure groups.**

**»» MAKE YOUR VOICE HEARD**

# *little steps #7*

**Eat less (or no) meat.  
Increase the number of  
vegetable-based dishes you eat.**

**»» REDUCE YOUR CARBON FOOTPRINT**

# *little steps #8*

**Avoid using cling film.**

**Use and reuse containers or wax wraps instead.**

**»» REDUCE NON-RECYCLABLE PLASTICS**

# *little steps #9*

**Avoid buying new clothes.  
Repair and recycle clothing  
as much as possible.**

**»» REDUCE POLLUTION**

# *little steps #10*

**Make your energy use 'greener':  
Switch suppliers, investigate  
solar panels, get better insulation.**

**»» REDUCE YOUR CARBON FOOTPRINT**
